Managing subcontracts in government contracting is increasingly complex as FAR and DFARS requirements evolve and CPSR scrutiny intensifies. Fragmented workflows and manual compliance processes make it harder to maintain consistent oversight, document decisions, and demonstrate compliance.

Intelligent automation is reshaping subcontract management, helping teams move from reactive, document heavy processes toward proactive oversight. At J.A. White, our proprietary platforms, CPSR ProDocs IQ, Pricing+, ClauseSync, FARegVision+, Lynx Business Systems, GovTariff, and NCSJ Flow, bring this approach to life. Together, they automate critical functions, and strengthen compliance across the procurement lifecycle.

Platform	Core Function	Automated Benefit	CPSR Criteria Addressed
CPSR ProDocs IQ	**Step-by-step FAR & DFARS aligned file creation.**	**Entire CPSR lifecycle.**	• Complete Documentation • Records Retention • Internal Reviews
ClauseSync	**Zero manual review. Intelligent clause management.**	**Replacing disconnected spreadsheets and email trails.**	• Clause Classification • Regulatory Clause Intelligence • Redline Collaboration
Pricing+	**Connects advanced pricing intelligence.**	**Giving government contractors greater visibility and stronger decision making.**	• Price & Cost Analysis • Negotiation Intelligence • Compliant Documentation
FARegVision+	**Regulatory intelligence engine.**	**Helping government contractors keep pace with acquisition changes.**	• Acquisition.gov Monitoring • Impact Analysis • Stakeholder Views
NCSJ Flow	**End-to-End Control for Noncompetitive Justifications.**	**Designed specifically for government procurement.**	• Specialized Workflows • Multi-Level Approvals • GiGi AI Compliance

Intelligent automation reduces administrative work, strengthens audit readiness, and gives compliance professionals more time to address strategic risks. The future of government contracting connects technology, insight, and compliance in one integrated approach.

- **85% - Audit preparation time reduction.**
- **70% - Manual data entry errors reduced.**
- **85% - Reduced penalties, withholds, and compliance costs.**
- **70% - Cost Savings & Return on Investment.**
- **95% - Procurement traceability and electronic audit trail.**
- **100% Procurement file compliance.**
