MORE MONEY, MORE SCRUTINY:

FAR, DFARS and CPSR Readiness in the Next Wave of Defense Contracting

The President has publicly stated a goal of a $1.5 trillion U.S. defense budget by 2027, representing an approximate 50% increase over the FY2026 level discussed in recent reporting, subject to the congressional budget process. As defense spending expands, oversight inevitably intensifies. Contractors can expect more frequent audits, heightened documentation standards, and increased pressure on business systems to demonstrate consistent performance under review.

The J.A. White & Associates, LLC webinar series sets the stage for what lies ahead. These sessions translate "big budget" headlines into practical compliance implications across the acquisition lifecycle from proposal pricing and cost analysis to subcontracting practices and purchasing system governance. Our experts will highlight real-world contractor challenges and common review triggers, with particular emphasis on:

- FAR Part 44 – Subcontracting Policies and Procedures
- CPSR expectations and purchasing system discipline

During the sessions, J.A. White will introduce their proprietary CPSR ProDocs IQ Ecosystem. An integrated suite of automated platforms designed to support scalable compliance for defense primes and subcontractors pursuing or maintaining approved business systems.

CPSR ProDocs IQ
Creates fully validated procurement files.

Pricing+
Automated cost and price analysis.

ClauseSync
Contract extraction & identification.

NCSJ Flow
Simplified Procurement Justifications.

Lynx
Compliance & audit management.

Tariff IQ
Trade classification and analysis.

SourceEdge
Document supplier selection decisions.

FARegVision+
Continuous monitor of FAR, DFARS.

Together, these solutions form an end-to-end automated compliance and procurement intelligence ecosystem that delivers continuous CPSR readiness, regulatory alignment, and audit-ready purchasing system performance.
